Projects

• University Project Portal

Developed a comprehensive online platform using the MERN (MongoDB, Express, React, Node.js) stack, enabling students to showcase and manage their college projects seamlessly. The portal provides a centralized hub for students to upload, share, and track their projects, fostering collaboration, innovation, and academic excellence.

• Course4U(Personalised Courses)

Designed and developed a course recommendation system that helps you find exactly what you need. Our platform, Course4U, recommends courses tailored to your preferences and suggests similar options as well. This system utilizes extensive data structures and algorithms (DSA) and is built on the MERN stack.
